NOTE.—Owing to a recent change in regulation, it is not now necessary for male teachers to hold a Cadet Instructor's certificate in order to obtain a Supervisor's or Specialist's certificate in Physical Training. Those desiring information regarding a Cadet Instructor's course should apply to Col. W. A. McCrimmon, 185 Spadina Avenue, Toronto, or to Prof. W. T. MacClement, Queen's University, Kingston, Ontario.

C. UPPER SCHOOL COURSES

The Department of Education will provide Upper School courses as follows:

(a) Upper School subjects—Mathematics and English at Kingston, Toronto, London and North Bay.

(b) Upper School subjects—Science, History, Latin and French—at Ottawa, Windsor and Port Arthur.

D. COURSE IN ORAL FRENCH (July 30th and August 24th)

This course is provided to enable teachers of French to improve themselves in French pronunciation, conversation and composition, as well as in methods of teaching the subject. The examination at the conclusion of the course is optional. Candidates who are successful in passing the examinations will be granted a certificate of standing. This year the course will be held in the city of Quebec from July 30th to August 24th. Arrangements will be made for board and lodging in the Sillery Academy for the lady teachers who attend. Suitable arrangements will also be made for the male teachers in attendance. A circular giving details regarding these arrangements and the organization of the course may be obtained on application to the Director of Summer Courses.

This is a very interesting and profitable course for teachers of French. The High School and Continuation School Inspectors state that improvement in the teaching of French in the secondary schools is apparent in all cases where teachers have taken the Summer Course in Oral French, and that the value of this course to the teachers and schools cannot be overestimated.

E. REFRESHER COURSES IN SCIENCE (July 30th to August 24th)

At the Ontario College of Education there will be a course in Lower School Biology and Middle School Chemistry each forenoon from 9 to 12 o'clock, and a course in Physics each afternoon from 2 to 4 o'clock. All courses will consist of lectures and experimental work. These courses are intended chiefly for teachers of Science in Continuation Schools and the smaller High Schools.

F. HEALTH TEACHING

It is the hope of the Department that this Course will fill an evident need. The rapidly changing conception of the place of the school and the school teacher in securing and maintaining maximum health in the community has led to the necessity for not only modification of the method of presentation of the subject, but also for a revision of our ideas as to what is scientifically acceptable to the health authorities. Newer knowledge and approved teaching practices will form the keynote of the curriculum. The Course will make provision for both formal and informal discussion; demonstrations of the use of acceptable devices and aids and observation; visits to appropriate places of interest.

2. QUALIFICATIONS FOR ADMISSION

The following are the qualifications for admission to the different courses:
